

## Lecenté Shimmer Films

### How to apply Lecenté Shimmer Films

---

Perform a manicure and prepare the natural nail for gel polish application, following manufacturer's recommendations.

- Apply a thin layer of Lecenté Foil Gel and cure for 120 seconds. Do not cap Foil Gel.
- Cut the shimmer film into shapes and randomly place into the cured Foil Gel using the Lecenté T1 applicator. Making sure all the edges and corners are laying flat and avoiding placing the film on the edges of the nail.
- Apply a layer of Smooth It! And really cap those edges and pieces in.
- Apply Top Coat, making sure the nail is completely sealed once again and cure for 30 seconds
- Remove top film with lint-free pad lightly saturated with 99% Isopropyl Alcohol.

#### STEP-BY-STEP (Advanced)

- Perform a manicure and prepare the natural nail for gel polish application, following manufacturer's recommendations.
- Apply a thin layer of Foil Gel and cure for 120 Seconds. Do not cap with Foil Gel.
- Cut a piece of the shimmer film just smaller than the size of the nail plate, scrunch, open it and place it onto the cured Foil Gel using your Lecenté T1 Applicator.
- Make sure the foil does not hit the edges as lifting may occur. Press down all the raw edges using the applicator so it sits as flat as possible on the nail.
- Apply Smooth It! Making sure any dips are filled in it is thoroughly capped. Cure for 60 seconds, refine if needed with a 180/240 file.
